

STATLEF/NEF SERIES

Working well under pressure!

- Clean burning L.P. or Natural Gas Forced Air Burner. Forced air burner technology consumes 30% less gas than any naturally asperated burner. Schedule 80 Coil with Steel Cold Wrap
- 50' non-marking hose
- Adjustable Pressure
- Chemical Injection
- Powder Coated Tube Frame
- Mechanical Thermal Relief Valve
- Trigger gun with 36" dual wand
- Interchangeable Nozzles
- Requires 1" gas line and 8" Vent.
- 208 Model is equipped to run one gun at full flow or two guns at 50% flow each while maintaining full pressure.
- 50 gallon tank helps maintain adequate water to the machine if inlet water falls below the consumption of the machine.
