

WASH POWER™

# Automate the unpleasant washing tasks in pig barns and increase the joy of working

- Improving work environment for you and your employees
- Increases the efficiency and reduces up to 80% of the manual washing work
- Working day and night, weekends and holidays

For over 10 years, the ProCleaner X100 has transformed the cleaning patterns of pig barns for farmers across the globe. Our robot is an efficient extra worker assisting you in your daily work on your pig farm. A reliable washing robot cutting down the hard manual cleaning work, thus improving the overall work environment for you and your employees.

ProCleaner X100 reduces up to 80% of the time spent on manual washing. Automizing the washing of your pig barns, you will have more time to spend on the well-being of your animals. The robot is easy to operate and designed to fit most pig barns. This is ensured by continuous development based upon experience from over 30 international markets so far.

The positive feedback we have received from our customers, both domestic and international, prove that ProCleaner X100 has become an integrated part of their daily work on the farm. A reliable worker who always delivers the same good result - also at night, weekends and holidays.

# Dimensions and data for the XS100

## TECHNICAL DATA

Dimensions HxWxD	63 x 20.43 x 43.3 inch
Weight	628 lbs
Power supply	120V **
Amperage	6 amp **
Water consumption	Min. 25 / maks. 40 l/m Min. 6.6 / Max 10.6 gallon/m
Max. water pressure	200 bar / 2900 psi
High pressure pump	External
Max. water temperature	140° F

\*\* ) XB100 = battery-driven

## Multiple variants for different needs

### X100 - Compact

For barns with some vertical obstacles close to the corridor, the compact module is an obvious choice. For other barns on your farm, without obstacles, you can use extension arms to extend the washing arms.

### XT100 - Turnable

We have specially developed XT100 to be used in barns where the ventilation shaft is placed within the barn or for houses with some few bearing pillars close to the corridor.

### XB100 - Battery

Battery version for big barns where hose length above 55m is needed. This model is equipped with a single hose and therefore we can offer 328 feet hose on the same hose roll. With a single battery the running time is 12-14 hours.

### XS100 - Xtra Slim

Xtra slim model developed for barns with xtra narrow corridor. Built with special wheels and when merged into the chassis we gain the extra centimeters needed to operate in tight places.

## Options for ProCleaner XS100

### Aluminium rails

Rails to help control the direction of the robot, that can be build with a infinity length.

### Extension arms

Extension arms of 19.7" and 39.4" inch will be a big help to get deeper into the pens.

### Larger hose diameter

Allows main washes with both nozzles at the same time. Requires a more powerful high-pressure pump (15-18 gallons).

### Special sidewheels

In some barns it's necessary with special side wheels for keeping the robot on track, depending on the inventory.

### Different wheels

Multiple options for wheel types, from air to solid and special wheels for an extra narrow robot.

### Text message module

Receive a text message from the robot when a wash is finished.

### Side guide

Adds the possibility to turn the wheels ever so slightly, to force the robot up against the inventory/wall as a direction guide.

### Ceiling

Making it possible to wash the ceiling.
